Analytic subject index

Aharonov–Bohm effect
– Electron interference in mesoscopic Au loops - Vloeberghs et al. 175 (1991) 217
AlAs–GaAs
– Tunneling of minority holes through a double-barrier resonant-tunneling structure under applied bias - Goovaerts et al. 175 (1991) 307
AlGaAs
– Influence of scattering on the I–V characteristics of double-barrier resonant-tunneling diodes - Van de Roer et al. 175 (1991) 301
AlGaAs–GaAs
– Ballistic electron transport in macroscopic high mobility structures - Hirayama et al. 175 (1991) 247
Alloy
– On the theory of propagation in random systems - Los' 175 (1991) 39

α-Fe_2O_3
– The Mössbauer study of ^{57}Fe enriched — fine particles with and without adsorbed cobalt - Sun et al. 175 (1991) 401

Amorphous alloys, Fe–B
– Structure and crystallization of amorphous Fe–B alloys obtained by chemical plating - Hu and Zhang 175 (1991) 396
Andreev reflection
– — and the Josephson effect in a quantum point contact - van Houten and Beenakker 175 (1991) 187
– Electron transmissivity of an interface between media with different electronic properties - van Huffelen et al. 175 (1991) 311
Atomic gases
– Superconductivity (superfluidity) and optical transparency effect in — - Tumaikin and Yudin 175 (1991) 161

Backscattering
– Coherent properties of optical phase conjugation in disordered media - Yudson and Reineker 175 (1991) 71
Ballistic electrons
– The semiconductor superlattice as an undulator - Malov and Zaretsky 175 (1991) 158
– Diffraction of conduction electrons from a Cu(4 1 0) surface - Hoevers and van Kempen 175 (1991) 253
Ballistic transport
– Electron and optical wave phenomena - Kaveh 175 (1991) 1
– 3-D magneto- — - van Gelder 175 (1991) 68
– Collimation effects in quantum point contacts - Taylor et al. 175 (1991) 243

– Ballistic electron transport in macroscopic high mobility structures - Hirayama et al. 175 (1991) 247
– Electron tunneling from the wedge - Sumetskii and Primak 175 (1991) 287
Beam splitter
– — effects in a nonlinear interferometer - Ben-Aryeh and Zahler 175 (1991) 133
Bistable system
– Optical bistability and instability - Macke et al. 175 (1991) 271
Boundary conditions
– 3-D magneto-ballistic transport - van Gelder 175 (1991) 68
Bragg diffraction
– An algebraic approach to the propagation of waves and particles in layered media - Ignatovich 175 (1991) 33

Chaos
– Optical bistability and instability - Macke et al. 175 (1991) 271
Charge buildup
– Intrinsic bistability in the current–voltage characteristics and electroluminescent emission of resonant tunnelling structures - Eaves et al. 175 (1991) 263
Charge transfer
– Magnetotunneling in a doubly connected system - Palacios and Tejedor 175 (1991) 315
Coercivity, α-Fe_2O_3
– The Mössbauer study of ^{57}Fe enriched α-Fe_2O_3 fine particles with and without adsorbed cobalt - Sun et al. 175 (1991) 401
Coherent backscattering
– Electron interference in mesoscopic Au loops - Vloeberghs et al. 175 (1991) 217
Coherent population trapping
– Superconductivity (superfluidity) and optical transparency effect in atomic gases - Tumaikin and Yudin 175 (1991) 161
Collimation
– — effects in quantum point contacts - Taylor et al. 175 (1991) 243
Computer algorithm
– The steady-state self-consistent solution to the nonlinear Wigner-function equation - Jansen et al. 175 (1991) 49
Conductance
– Electron tunneling from the wedge - Sumetskii and Primak 175 (1991) 287
Conductance fluctuations
– Numerical study of nonlinear — in mesoscopic wires - Levy Yeyati 175 (1991) 61
Conductance oscillations
– Coulomb-blockade oscillations in a quantum dot - Staring et al. 175 (1991) 226
– Periodic — in a Si-MOSFET point contact - de Graaf et al. 175 (1991) 239
Conductivity
– On the theory of propagation in random systems - Los' 175 (1991) 39
Correlated fluctuations
– Wave propagation in random media - Erdös et al. 175 (1991) 25
Correlation energy
– Numerical study of nonlinear conductance fluctuations in mesoscopic wires - Levy Yeyati 175 (1991) 61

Correlations
– Electron and optical wave phenomena - Kaveh 175 (1991) 1
Coulomb blockade
– Coulomb-blockade oscillations in a quantum dot - Staring et al. 175 (1991) 226
– Periodic conductance oscillations in a Si-MOSFET point contact - de Graaf et al. 175 (1991) 239
– Magnetotunneling in a doubly connected system - Palacios and Tejedor 175 (1991) 315
Coulomb gap
– Metal–insulator transition in thin TiO_x films - Vlekken et al. 175 (1991) 55

Decompostion of HTSCs
– Oxygen mass transfer in the decomposition and synthesis of high-temperature superconductors - Sobol 175 (1991) 370
Delta-doping
– Tunneling-assisted optical transitions in GaAs delta-doped superlattices - Alperovich et al. 175 (1991) 153
Detailed balance
– The DC electron transport investigation by the union of two linear response formulae - Milinski and Budinski 175 (1991) 57
Dielectric crystal
– Photonic band structure: Non-spherical atoms in the face-centered-cubic case - Yablonovitch and Leung 175 (1991) 81
Dielectric relaxation
– Dielectric behaviour of Ge_xSe_{100-x} and $Ge_{22}Se_{68}M_{10}$ (M = Ag, In, Pb, Cd) glassy alloys - Arora and Kumar 175 (1991) 381
Diffraction
– — of conduction electrons from a Cu(4 1 0) surface - Hoevers and van Kempen 175 (1991) 253
Disordered medium
– Coherent properties of optical phase conjugation in disordered media - Yudson and Reineker 175 (1991) 71
Disordered structure
– Magnetic order in mesoscopic metal films - Van Haesendonck et al. 175 (1991) 179
Disordered systems
– Influencing the approach to the localization threshold - Garcia et al. 175 (1991) 9
– On the theory of propagation in random systems - Los' 175 (1991) 39
– Metal–insulator transition in thin TiO_x films - Vlekken et al. 175 (1991) 55
– Numerical study of nonlinear conductance fluctuations in mesoscopic wires - Levy Yeyati 175 (1991) 61
Double barrier heterostructure
– Effect of a parallel capacitor on the stability of the DC-configurations of a DBRT-structure - Joosten et al. 175 (1991) 297
Double barrier structure
– Intrinsic bistability in the current–voltage characteristics and electroluminescent emission of resonant tunnelling structures - Eaves et al. 175 (1991) 263
Double quantum wells
– Hydrogenic impurity in double quantum wells: effects of the image charges - Tran Thoai 175 (1991) 373

Edge channel states
– The influence of impurities on inter-Landau-level equilibration - Alphenaar et al. 175 (1991) 235
Electrical conductivity
– The DC electron transport investigation by the union of two linear response formulae - Milinski and Budinski 175 (1991) 57
Electrochemical potential
– — variations in mesoscopic systems - Pernas and Flores 175 (1991) 221
Electroluminescence
– Intrinsic bistability in the current–voltage characteristics and electroluminescent emission of resonant tunnelling structures - Eaves et al. 175 (1991) 263
Electron interference
– — in mesoscopic Au loops - Vloeberghs et al. 175 (1991) 217
Electron transmissivity
– — of an interface between media with different electronic properties - van Huffelen et al. 175 (1991) 311
Electron transport
– The steady-state self-consistent solution to the nonlinear Wigner-function equation - Jansen et al. 175 (1991) 49
– Equilibrium and shot noise in mesoscopic systems - Landauer and Martin 175 (1991) 167
– Effect of a parallel capacitor on the stability of the DC-configurations of a DBRT-structure - Joosten et al. 175 (1991) 297
– Electron transmissivity of an interface between media with different electronic properties - van Huffelen et al. 175 (1991) 311
Electron wave packet
– Equilibrium and shot noise in mesoscopic systems - Landauer and Martin 175 (1991) 167

Fabry–Perot cavity
– Optical bistability and instability - Macke et al. 175 (1991) 271
Fe–B alloys, amorphous
– Structure and crystallization of amorphous Fe–B alloys obtained by chemical plating - Hu and Zhang 175 (1991) 396
Fe–Co–C, phase diagram under pressure
– The ternary constitution diagrams for the Fe–Ni–C and Fe–Co–C systems at 5.7 GPa - Pavel et al. 175 (1991) 354
Fe–Ni–C, phase diagram under pressure
– The ternary constitution diagrams for the Fe–Ni–C and Fe–Co–C systems at 5.7 GPa - Pavel et al. 175 (1991) 354
Field correlation
– Intensity and field correlations in multiple scattered light - de Boer et al. 175 (1991) 17
Floquet theory
– Suppression of tunneling in periodically driven bistable systems - Großmann et al. 175 (1991) 293
Flux fluctuations
– The quantum phase of flux correlations in waveguides - Büttiker 175 (1991) 199
Franz–Keldysh effect
– Tunneling-assisted optical transitions in GaAs delta-doped superlattices - Alperovich et al. 175 (1991) 153

Frustrated internal reflection
– Analogies between electron and photon tunneling - Chiao et al. 175 (1991) 257

GaAs
– Tunneling-assisted optical transitions in — delta-doped superlattices - Alperovich et al. 175 (1991) 153
GaAs–AlGaAs
– Effect of a parallel capacitor on the stability of the DC-configurations of a DBRT-structure - Joosten et al. 175 (1991) 297
Geometric phase
– Evolution of light beams in polarization and direction - Bhandari 175 (1991) 111
$Ge_{22}Se_{68}M_{10}$(M = Ag, In, Pb, Cd) glassy alloys
– Dielectric behaviour of Ge_xSe_{100-x} and $Ge_{22}Se_{68}M_{10}$ (M = Ag, In, Pb, Cd) glassy alloys - Arora and Kumar 175 (1991) 381
Ge_xSe_{100-x} glassy alloys
– Dielectric behaviour of Ge_xSe_{100-x} and $Ge_{22}Se_{68}M_{10}$ (M = Ag, In, Pb, Cd) glassy alloys - Arora and Kumar 175 (1991) 381

Heterojunction
– Electron tunneling from the wedge - Sumetskii and Primak 175 (1991) 287
Heterostructure
– Electron transmissivity of an interface between media with different electronic properties - van Huffelen et al. 175 (1991) 311
High-T_c superconductors, oxygen mass transfer
– Oxygen mass transfer in the decomposition and synthesis of high-temperature superconductors - Sobol 175 (1991) 370
Hole tunneling
– Tunneling of minority holes through a double-barrier resonant-tunneling structure under applied bias - Goovaerts et al. 175 (1991) 307
Hydrogenic impurity in double quantum wells
– —: effects of the image charges - Tran Thoai 175 (1991) 373

Impact ionization
– Intrinsic bistability in the current–voltage characteristics and electroluminescent emission of resonant tunnelling structures - Eaves et al. 175 (1991) 263
Impurity potential
– The influence of impurities on inter-Landau-level equilibration - Alphenaar et al. 175 (1991) 235
Incompatible observables
– Joint measurement of interference and path observables in optics and neutron interferometry - de Muynck et al. 175 (1991) 127
Intensity correlation
– Intensity and field correlations in multiple scattered light - de Boer et al. 175 (1991) 17
Inter-Landau-level scattering
– The influence of impurities on inter-Landau-level equilibration - Alphenaar et al. 175 (1991) 235
Interference
– Electron and optical wave phenomena - Kaveh 175 (1991) 1

Interferometry
– Joint measurement of interference and path observables in optics and neutron — - de Muynck et al. 175 (1991) 127

Joint measurement
– — of interference and path observables in optics and neutron interferometry - de Muynck et al. 175 (1991) 127

Josephson junction
– Andreev reflection and the Josephson effect in a quantum point contact - van Houten and Beenakker 175 (1991) 187

Kerr interaction
– Beam splitter effects in a nonlinear interferometer - Ben-Aryeh and Zahler 175 (1991) 133

Kondo effect
– Magnetic order in mesoscopic metal films - Van Haesendonck et al. 175 (1991) 179

Kubo formula
– The DC electron transport investigation by the union of two linear response formulae - Milinski and Budinski 175 (1991) 57

Langevin–Kielich functions
– Generalised — for the optical Kerr effect in liquid water: theory and simulation - Evans et al. 175 (1991) 412

Laser field
– Optical Stern–Gerlach effect; separation of a gas according to atomic spin projections in polarized laser fields - Tumaikin and Bezverbny 175 (1991) 143

Layered media
– An algebraic approach to the propagation of waves and particles in — - Ignatovich 175 (1991) 33

Level crossing
– Suppression of tunneling in periodically driven bistable systems - Großmann et al. 175 (1991) 293

Light localization in dense media
– Weak localization of light in a half-space of densely distributed discrete scatterers - Genchev 175 (1991) 405

Linear response
– The DC electron transport investigation by the union of two — formulae - Milinski and Budinski 175 (1991) 57

LiPb liquid alloy, resistivity
– A nonlocal pseudopotential calculation of the resistivity of liquid metals and the LiPb alloy - Akinlade 175 (1991) 389

Liquid metals, resistivity
– A nonlocal pseudopotential calculation of the resistivity of liquid metals and the LiPb alloy - Akinlade 175 (1991) 389

Localization
– Influencing the approach to the — threshold - Garcia et al. 175 (1991) 9
– On the theory of propagation in random systems - Los' 175 (1991) 39
– Quantum electrodynamics of localized light - John 175 (1991) 87
– Magnetic order in mesoscopic metal films - Van Haesendonck et al. 175 (1991) 179

– Suppression of tunneling in periodically driven bistable systems - Großmann et al. 175 (1991) 293
Localization of light
– Intensity and field correlations in multiple scattered light - de Boer et al. 175 (1991) 17
– Weak — in a half-space of densely distributed discrete scatterers - Genchev 175 (1991) 405
Long range correlations
– Influencing the approach to the localization threshold - Garcia et al. 175 (1991) 9

Mach–Zehnder interferometer
– Beam splitter effects in a nonlinear interferometer - Ben-Aryeh and Zahler 175 (1991) 133
Magnetic moments of $Y(Fe–Co)_{12-x}T_x$
– — alloys - Christides et al. 175 (1991) 329
Magnetic properties of $SmGa_2$
– — - Blanco et al. 175 (1991) 349
Magnetic properties of $[YPc_2] \cdot CH_2Cl_2$
– Organic ferromagnetic chain in the yttrium diphthalocyanine $[YPc_2] \cdot CH_2Cl_2$ - Paillaud et al. 175 (1991) 337
Magnetic valence
– Magnetic moments of $Y(Fe–Co)_{12-x}T_x$ alloys - Christides et al. 175 (1991) 329
Magneto transport
– Magnetic order in mesoscopic metal films - Van Haesendonck et al. 175 (1991) 179
Magnetoresistance
– 3-D magneto-ballistic transport - van Gelder 175 (1991) 68
– Electron interference in mesoscopic Au loops - Vloeberghs et al. 175 (1991) 217
– — oscillations in the quantum Hall regime - Nielsen 175 (1991) 231
– Collimation effects in quantum point contacts - Taylor et al. 175 (1991) 243
– Ballistic electron transport in macroscopic high mobility structures - Hirayama et al. 175 (1991) 247
Magnetotunneling
– — in a doubly connected system - Palacios and Tejedor 175 (1991) 315
Matter waves
– Similarities between atomic wave packets and optical pulses - Noordam et al. 175 (1991) 139
Mesoscopic systems
– Electron and optical wave phenomena - Kaveh 175 (1991) 1
– The steady-state self-consistent solution to the nonlinear Wigner-function equation - Jansen et al. 175 (1991) 49
– Numerical study of nonlinear conductance fluctuations in mesoscopic wires - Levy Yeyati 175 (1991) 61
– Theory of near-field optics with applications to SNOM and optical binding - Dereux et al. 175 (1991) 65
– Equilibrium and shot noise in — - Landauer and Martin 175 (1991) 167
– Electron interference in mesoscopic Au loops - Vloeberghs et al. 175 (1991) 217
– Electrochemical potential variations in — - Pernas and Flores 175 (1991) 221
– Magnetotunneling in a doubly connected system - Palacios and Tejedor 175 (1991) 315
Metal–insulator transition
– — in thin TiO_x films - Vlekken et al. 175 (1991) 55
Microcavity laser
– Control of spontaneous emission in — diodes - Shore 175 (1991) 123

Microwave simulation
– Optical-tunneling time measures: a microwave model - Ranfagni et al. 175 (1991) 283
Mössbauer study
– The — of ^{57}Fe enriched α-Fe_2O_3 fine particles with and without adsorbed cobalt - Sun et al. 175 (1991) 401
Multilayered system
– The driven optical ring resonator as a model system for quantum optics - Spreeuw and Woerdman 175 (1991) 96

Near-field optics
– Theory of — with applications to SNOM and optical binding - Dereux et al. 175 (1991) 65
Noise spectroscopy
– Low-frequency noise of quantum point contacts in the ballistic and quantum Hall regime - Liefrink et al. 175 (1991) 213
Nonlinear optics
– Optical bistability and instability - Macke et al. 175 (1991) 271
Nonlinear Schrödinger equation
– Nonlinear, nonlocal Schrödinger equations - Heimsoeth and Lange 175 (1991) 44
Nonlocality
– Nonlinear, nonlocal Schrödinger equations - Heimsoeth and Lange 175 (1991) 44

One-dimensional ferromagnetism
– Organic ferromagnetic chain in the yttrium diphthalocyanine $[YPc_2] \cdot CH_2Cl_2$ - Paillaud et al. 175 (1991) 337
Optical analogue
– Observation of the — of the quantised conductance of a point contact - Montie et al. 175 (1991) 149
Optical atom
– The driven optical ring resonator as a model system for quantum optics - Spreeuw and Woerdman 175 (1991) 96
Optical binding
– Theory of near-field optics with applications to SNOM and — - Dereux et al. 175 (1991) 65
Optical gain
– The semiconductor superlattice as an undulator - Malov and Zaretsky 175 (1991) 158
Optical interferometry
– Beam splitter effects in a nonlinear interferometer - Ben-Aryeh and Zahler 175 (1991) 133
Optical Kerr effect
– Generalised Langevin–Kielich functions for the — in liquid water: theory and simulation - Evans et al. 175 (1991) 412
Optical phase conjugation
– Coherent properties of — in disordered media - Yudson and Reineker 175 (1991) 71
– Andreev reflection and the Josephson effect in a quantum point contact - van Houten and Beenakker 175 (1991) 187
Optical ring resonator
– The driven — as a model system for quantum optics - Spreeuw and Woerdman 175 (1991) 96
Optical switch
– An — based on Pancharatnam's topological phase - Schmitzer et al. 175 (1991) 148

Organic ferromagnetic chain
– — in the yttrium diphthalocyanine $[YPc_2] \cdot CH_2Cl_2$ - Paillaud et al. 175 (1991) 337

Pancharatnam's phase
– An optical switch based on Pancharatnam's topological phase - Schmitzer et al. 175 (1991) 148
Phase diagram under pressure, Fe–Co–C
– The ternary constitution diagrams for the Fe–Ni–C and Fe–Co–C systems at 5.7 GPa - Pavel et al. 175 (1991) 354
Phase diagram under pressure, Fe–Ni–C
– The ternary constitution diagrams for the Fe–Ni–C and Fe–Co–C systems at 5.7 GPa - Pavel et al. 175 (1991) 354
Phase jumps
– Evolution of light beams in polarization and direction - Bhandari 175 (1991) 111
Phase memory
– Coherent properties of optical phase conjugation in disordered media - Yudson and Reineker 175 (1991) 71
Phase sensitive fluctuation loop
– The quantum phase of flux correlations in waveguides - Büttiker 175 (1991) 199
Photoluminescence, time-resolved
– Tunneling of minority holes through a double-barrier resonant-tunneling structure under applied bias - Goovaerts et al. 175 (1991) 307
Photon–atom bound state
– Quantum electrodynamics of localized light - John 175 (1991) 87
Photon tunneling
– Analogies between electron and — - Chiao et al. 175 (1991) 257
Photonic band gap
– Photonic band structure: Non-spherical atoms in the face-centered-cubic case - Yablonovitch and Leung 175 (1991) 81
– Quantum electrodynamics of localized light - John 175 (1991) 87
– Control of spontaneous emission in microcavity laser diodes - Shore 175 (1991) 123
Photonic bandstructure
– Photonic band structure: Non-spherical atoms in the face-centered-cubic case - Yablonovitch and Leung 175 (1991) 81
Photonic crystal
– Photonic band structure: Non-spherical atoms in the face-centered-cubic case - Yablonovitch and Leung 175 (1991) 81
Photoreflectance
– Tunneling-assisted optical transitions in GaAs delta-doped superlattices - Alperovich et al. 175 (1991) 153
Pluton statistics
– Beam splitter effects in a nonlinear interferometer - Ben-Aryeh and Zahler 175 (1991) 133
Point contacts
– 3-D magneto-ballistic transport - van Gelder 175 (1991) 68
– Periodic conductance oscillations in a Si-MOSFET point contact - de Graaf et al. 175 (1991) 239
Polaritons
– Theory of near-field optics with applications to SNOM and optical binding - Dereux et al. 175 (1991) 65

Polarization optics
– Evolution of light beams in polarization and direction - Bhandari 175 (1991) 111
– Optical Stern–Gerlach effect; separation of a gas according to atomic spin projections in polarized laser fields - Tumaikin and Bezverbny 175 (1991) 143

Quantized conductance
– Observation of the optical analogue of the quantised conductance of a point contact - Montie et al. 175 (1991) 149
Quantum coherence
– Numerical study of nonlinear conductance fluctuations in mesoscopic wires - Levy Yeyati 175 (1991) 61
– Electrochemical potential variations in mesoscopic systems - Pernas and Flores 175 (1991) 221
Quantum dot
– Coulomb-blockade oscillations in a — - Staring et al. 175 (1991) 226
Quantum Hall effect
– Magnetoresistance oscillations in the quantum Hall regime - Nielsen 175 (1991) 231
Quantum interferometer
– Magnetoresistance oscillations in the quantum Hall regime - Nielsen 175 (1991) 231
Quantum mechanics
– Programs for modeling waves in quantum-size microstructures - Tkachenko et al. 175 (1991) 75
Quantum optics
– The driven optical ring resonator as a model system for — - Spreeuw and Woerdman 175 (1991) 96
Quantum optics analogies
– Optical-tunneling time measures: a microwave model - Ranfagni et al. 175 (1991) 283
Quantum point contacts
– Observation of the optical analogue of the quantised conductance of a point contact - Montie et al. 175 (1991) 149
– Andreev reflection and the Josephson effect in a quantum point contact - van Houten and Beenakker 175 (1991) 187
– Low-frequency noise of — in the ballistic and quantum Hall regime - Liefrink et al. 175 (1991) 213
– Collimation effects in — - Taylor et al. 175 (1991) 243
Quantum wells
– Hydrogenic impurity in double —: effects of the image charges - Tran Thoai 175 (1991) 373

Random media
– Wave propagation in — - Erdös et al. 175 (1991) 25
Random telegraph signals
– Low-frequency noise of quantum point contacts in the ballistic and quantum Hall regime - Liefrink et al. 175 (1991) 213
Resistance
– Wave propagation in random media - Erdös et al. 175 (1991) 25
Resonant tunneling
– Programs for modeling waves in quantum-size microstructures - Tkachenko et al. 175 (1991) 75
– Coulomb-blockade oscillations in a quantum dot - Staring et al. 175 (1991) 226
– Magnetoresistance oscillations in the quantum Hall regime - Nielsen 175 (1991) 231

– Intrinsic bistability in the current–voltage characteristics and electroluminescent emission of resonant tunnelling structures - Eaves et al. 175 (1991) 263
– Effect of a parallel capacitor on the stability of the DC-configurations of a DBRT-structure - Joosten et al. 175 (1991) 297
– Influence of scattering on the *I–V* characteristics of double-barrier resonant-tunneling diodes - Van de Roer et al. 175 (1991) 301
– Tunneling of minority holes through a double-barrier resonant-tunneling structure under applied bias - Goovaerts et al. 175 (1991) 307

$R_2Fe_{17}C_x$ (R = Y,Tb,Tm)
– Thermal expansion anomalies and spontaneous magnetostriction in $R_2Fe_{17}C_x$ intermetallic compounds - Andreev et al. 175 (1991) 361

Rydberg atom
– Similarities between atomic wave packets and optical pulses - Noordam et al. 175 (1991) 139

Scattered light
– Intensity and field correlations in multiple — - de Boer et al. 175 (1991) 17

Scattering
– The DC electron transport investigation by the union of two linear response formulae - Milinski and Budinski 175 (1991) 57
– Influence of — on the *I–V* characteristics of double-barrier resonant-tunneling diodes - Van de Roer et al. 175 (1991) 301

Semiconductor laser
– Control of spontaneous emission in microcavity laser diodes - Shore 175 (1991) 123

Short optical pulse
– Similarities between atomic wave packets and optical pulses - Noordam et al. 175 (1991) 139

Shot noise
– Equilibrium and — in mesoscopic systems - Landauer and Martin 175 (1991) 167
– The quantum phase of flux correlations in waveguides - Büttiker 175 (1991) 199

Si-MOSFET
– Periodic conductance oscillations in a — point contact - de Graaf et al. 175 (1991) 239

$SmGa_2$
– Magnetic properties of — - Blanco et al. 175 (1991) 349

Software
– Programs for modeling waves in quantum-size microstructures - Tkachenko et al. 175 (1991) 75

Spatial separation of atoms
– Optical Stern–Gerlach effect; separation of a gas according to atomic spin projections in polarized laser fields - Tumaikin and Bezverbny 175 (1991) 143

Spin
– Optical Stern–Gerlach effect; separation of a gas according to atomic — projections in polarized laser fields - Tumaikin and Bezverbny 175 (1991) 143

Spinor interferometry
– Evolution of light beams in polarization and direction - Bhandari 175 (1991) 111

Spontaneous emission
– Control of — in microcavity laser diodes - Shore 175 (1991) 123

Spontaneous magnetostriction, $R_2Fe_{17}C_x$
– Thermal expansion anomalies and spontaneous magnetostriction in $R_2Fe_{17}C_x$ intermetallic compounds - Andreev et al. 175 (1991) 361

Stability
– Effect of a parallel capacitor on the — of the DC-configurations of a DBRT-structure - Joosten et al. 175 (1991) 297
Stochastic processes
– Wave propagation in random media - Erdös et al. 175 (1991) 25
Structure of amorphous Fe–B alloys
– Structure and crystallization of amorphous Fe–B alloys obtained by chemical plating - Hu and Zhang 175 (1991) 396
Superconductivity
– — (superfluidity) and optical transparency effect in atomic gases - Tumaikin and Yudin 175 (1991) 161
Superlattice
– Programs for modeling waves in quantum-size microstructures - Tkachenko et al. 175 (1991) 75
– Tunneling-assisted optical transitions in GaAs delta-doped superlattices - Alperovich et al. 175 (1991) 153
– The semiconductor — as an undulator - Malov and Zaretsky 175 (1991) 158
Surface scattering
– Diffraction of conduction electrons from a Cu(4 1 0) surface - Hoevers and van Kempen 175 (1991) 253

Thermal expansion, $R_2Fe_{17}C_x$
– Thermal expansion anomalies and spontaneous magnetostriction in $R_2Fe_{17}C_x$ intermetallic compounds - Andreev et al. 175 (1991) 361
Thin films
– Metal–insulator transition in thin TiO_x films - Vlekken et al. 175 (1991) 55
– Magnetic order in mesoscopic metal films - Van Haesendonck et al. 175 (1991) 179
Thouless number
– Influencing the approach to the localization threshold - Garcia et al. 175 (1991) 9
Time-dependent quantum mechanics
– Suppression of tunneling in periodically driven bistable systems - Großmann et al. 175 (1991) 293
Transmission
– Equilibrium and shot noise in mesoscopic systems - Landauer and Martin 175 (1991) 167
– Effect of a parallel capacitor on the stability of the DC-configurations of a DBRT-structure - Joosten et al. 175 (1991) 297
– Electron transmissivity of an interface between media with different electronic properties - van Huffelen et al. 175 (1991) 311
Traversal time
– Analogies between electron and photon tunneling - Chiao et al. 175 (1991) 257
Tunnel splittings
– Suppression of tunneling in periodically driven bistable systems - Großmann et al. 175 (1991) 293
Tunneling
– Metal–insulator transition in thin TiO_x films - Vlekken et al. 175 (1991) 55
– Periodic conductance oscillations in a Si-MOSFET point contact - de Graaf et al. 175 (1991) 239
– Optical- — time measures: a microwave model - Ranfagni et al. 175 (1991) 283
– Electron — from the wedge - Sumetskii and Primak 175 (1991) 287

Tunneling time
– Analogies between electron and photon tunneling - Chiao et al. 175 (1991) 257
Two-dimensional electron gas
– Ballistic electron transport in macroscopic high mobility structures - Hirayama et al. 175 (1991) 247
– Magnetotunneling in a doubly connected system - Palacios and Tejedor 175 (1991) 315
Two-level system
– The driven optical ring resonator as a model system for quantum optics - Spreeuw and Woerdman 175 (1991) 96
– Optical bistability and instability - Macke et al. 175 (1991) 271

Undulator
– The semiconductor superlattice as an — - Malov and Zaretsky 175 (1991) 158

Velocity-induced orientation
– Optical Stern–Gerlach effect; separation of a gas according to atomic spin projections in polarized laser fields - Tumaikin and Bezverbny 175 (1991) 143

Wave packets
– Similarities between atomic — and optical pulses - Noordam et al. 175 (1991) 139
Wave–particle propagation
– Optical-tunneling time measures: a microwave model - Ranfagni et al. 175 (1991) 283
Wave propagation
– Electron and optical wave phenomena - Kaveh 175 (1991) 1
– Influencing the approach to the localization threshold - Garcia et al. 175 (1991) 9
– — in random media - Erdös et al. 175 (1991) 25
– An algebraic approach to the propagation of waves and particles in layered media - Ignatovich 175 (1991) 33
– Theory of near-field optics with applications to SNOM and optical binding - Dereux et al. 175 (1991) 65
– Coherent properties of optical phase conjugation in disordered media - Yudson and Reineker 175 (1991) 71
Wigner equation
– The steady-state self-consistent solution to the nonlinear Wigner-function equation - Jansen et al. 175 (1991) 49

$Y(Fe–Co)_{12-x}T_x$ alloys (T = Ti, V, Cr, Mo, W, Re)
– Magnetic moments of $Y(Fe–Co)_{12-x}T_x$ alloys - Christides et al. 175 (1991) 329
$[YPc_2] \cdot CH_2Cl_2$
– Organic ferromagnetic chain in the yttrium diphthalocyanine — - Paillaud et al. 175 (1991) 337
